How do we connect the programs from each hillside

How can we bring more scale into the block housing section

How can we preserve the historical aspect to the TV studio

How do we bring greater recognition to it

How do we connect the programs from each hillside

Can the "idiots" different or better purpose

How can we redevelop the brownfields to become more economical

Do we need another multi-program heavy city center? Another type of city center

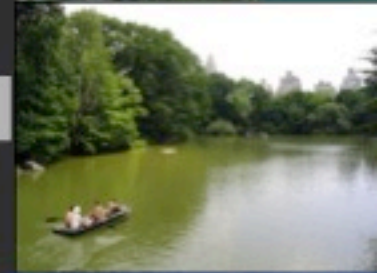

Tuzla

Zagreb

New York

Boston

- Mirrors the green strip near old city center
- Connects two parks on north and south surrounding mountains
- New type of recreation facilities for the city
- Revitalizes area
- New types of businesses to bring new aspect to the economy
- Changes to block courtyards add scale
- Courtyards to become more lively; not as empty

Thank you
